RE:- UV PROTECTION

Dear PAUL,

The black glass filled nylon 6 compound Duralon N6 25G HSBK106L we supply you contains additives and pigments incorporated specifically to protect the nylon against premature UV breakdown.

The additive and pigments we have incorporated are the same as we use for products we have been supplying into exterior applications in the Australian automotive industry for well over 10 years.

Examples of some of these products are components for various leading roof rack brands and Toyota 4WD bull bar bump pads.

Yours Sincerely,

Brendan Jones.
